

MÖTESPLATS
SAMHÄLLSSÄKERHET
KISTAMÄSSAN 24-25 NOVEMBER 2015

National Symposium on Technology and Methodology
for Security and Crisis Management
November 24-25, 2015, Kista, Sweden

First call for abstracts

A first aim of the Symposium is to give a comprehensive presentation of the Swedish research and development activities in the security area. Through a number of 'state of the art' presentations from international experts and contributions from other Swedish and international research groups and industry we also want to give a broad view on international developments in the field. A second aim is to provide a national meeting place for researchers, industry, end-users and decision makers, all under the umbrella of the bi-annual Mötesplats Samhällssäkerhet at Kistamässan.

Research topics include, but are not limited to, the topics in focus for the strategic research areas (SFO) and the national research and innovation agendas (NRIA 2011, FIA 2013)

- Secure and robust wireless communications
- Advanced sensors and detectors
- Cyber security
- Interoperability
- Decision support for emergency and crisis response
- Information management
- Risk analysis and management
- Ethics
- Disaster science
- Other

Application areas in focus are

- Critical infrastructure protection
- Transport and logistics, including airport and port security
- Border security
- Technology, methods and training for first responders
- Other

Organisation committee

Fredrik Gustafsson, LiU
Hans Frennberg, FOI
Sofie Pilemalm, LiU
Christina Grönwall, LiU, FOI
Sara Strömberg, LiU

Programme committee
